

Kallio

Kallio bollards are ideal for lighting pathways and plantings in the yard. The splash proof body of the upright Kallio light is made of stainless steel. You can choose between two colour and coating options for the body: grey stone coating or powder-painted anthracite grey with a matte surface. The tempered glass dome disperses the light beautifully. Install together with a concrete base and a support tube (4107058), or choose a ground support tube (4107104) that can be sunk directly into the ground.

- Steel body, clear glass.
- Anthracite, RAL 7016 and stone coating.
- Type of wiring, ending 3 x 2.5 mm² connectors.
- Recommendation P45 bulb, E27 or Airam Tubular 7,5 W E27. Not included.
- IP44.
- Temperature of environment of use -20 ... 25 °C, depending on the bulb.
